

IELTS Writing 7+ Diagnostic Report

STUDENT Sun	DATE 18 Jul 2026, 14:55
TASK TYPE Task 2	ESSAY TYPE Opinion Essay
WORD COUNT 254	REPORT LANGUAGE English

Estimated Band Range

6.0

Executive Summary

MAIN SCORE-LIMITING FACTOR

The main route is visible, but 2 body paragraphs still lack precise causal development, and the conclusion does not yet close the policy and route securely. Recurring lexical and grammatical errors also prevent a secure Band 7 profile.

MOST URGENT REPAIR

Keep the valid task route. Rebuild each weak explanation as affected group -> mechanism -> result, make examples credible, close the same route in the conclusion, and then complete a full language edit.

COMPLETION STATUS

complete | Verified count: 254/250 words | Detected structure: Introduction + Body 1 + Body 2 + conclusion | Paragraph-detection confidence: High | Conclusion status: Present and complete

Estimated range, not an official IELTS score.

Position and Route

strongly disagree (high confidence)

Detected position: strongly disagree | Body 1 route: develops a reason aligned with the writer's disagreement | Body 2 route: develops a reason aligned with the writer's disagreement | Conclusion route: restates strongly disagree | Overall route status: adequately developed

IELTS Criteria Breakdown

TASK RESPONSE

6.0-6.5

The task route is adequately developed, and the response is complete.

Some people may argue that towns and cities should be separated into zones, so all the same places are in the same area.

COHERENCE & COHESION

6.0

Paragraph progression is adequately developed, and the conclusion is present and complete.

Some people may argue that towns and cities should be separated into zones, so all the same places are in the same area.

LEXICAL RESOURCE

6.0

Relevant topic vocabulary is used, but repeated vague nouns, unnatural word choices and collocations occur across the response, so lexical control is not securely Band 7.

Some people may argue that towns and cities should be separated into zones, so all the same places are in the same area.

GRAMMATICAL RANGE & ACCURACY

6.0

The essay uses both simple and complex sentences, but recurring problems with sentence construction, reference, prepositions, noun forms and punctuation prevent a secure Band 7 grammar profile.

Some people may argue that towns and cities should be separated into zones, so all the same places are in the same area.

Kru Pom Framework Breakdown

POSITION CLARITY

Strong

The writer clearly and consistently communicates the required judgement.

THESIS ROUTE CLARITY**Strong**

The introduction states strongly disagree and establishes the body route required by the task; route clarity is assessed separately from language precision.

BODY PARAGRAPH ROUTE ALIGNMENT**Strong**

Body 1: develops a reason aligned with the writer's disagreement [partially developed] | Body 2: develops a reason aligned with the writer's disagreement [partially developed]

EXPLANATION DEPTH**Moderate**

The body routes are relevant, but the causal mechanisms and consequences need more precise evidence-based development.

SAR EXAMPLE QUALITY**Moderate**

Examples should prove each body claim through a credible situation, mechanism and result rather than merely adding length.

LINK BACK CONTROL**Moderate**

Body 1 attempts a link-back but has an incomplete sentence ending and imprecise wording. Body 2 ends with a result but needs a cleaner paragraph-level return to the reason.

CONCLUSION CLOSURE**Moderate**

The conclusion broadly preserves the route, but policy reference, clause control or body-route matching still needs repair.

LFC CPC CONTROL**Moderate**

The paragraph routes are visible, but sentence-level language and paragraph closure remain inconsistent.

Top Evidence-Based Issues

1 Conclusion Precision and Route Closure

Moderate Task Response, Coherence & Cohesion, Lexical Resource, Grammatical Range & Accuracy

Evidence Scope: single-location

Paragraph Locations: Conclusion, Sentence 1

Conclusion, Sentence 1 - Conclusion Precision and Route Closure

In conclusion, I firmly believe that specific places like towns and cities should not be divided into zones, thus all the same places are in one area, since this could contribute to the difficulty in traveling and the congestion of traffic.

Diagnosis: The conclusion does not close the route securely: multiple language-control issues in the conclusion.

Student Action: Write one complete conclusion sentence that restates the same position and body routes using prompt-accurate terminology.

2 Full-Response Grammatical and Sentence Control

Moderate Grammatical Range & Accuracy

Evidence Scope: single-location

Paragraph Locations: Body Paragraph 1, Sentence 2

Representative Evidence

Body Paragraph 1, Sentence 2 - Full-Response Grammatical and Sentence Control

Every family is living in different places and distances, which could be very far away from their house, so it would be very difficult to travel through long distance.

Diagnosis: The progressive tense is not controlled for a general statement.

Student Action: Search the full response for the same tense control pattern and correct every recurrence before adding optional refinements.

3 Body 1 Paragraph Closure and Link-Back

Moderate Coherence & Cohesion, Grammatical Range & Accuracy

Evidence Scope: single-location

Paragraph Locations: Body Paragraph 1, Sentence 4

Body Paragraph 1, Sentence 4 - Body 1 Paragraph Closure and Link-Back

Therefore, when a certain place is clustered in one area, some people might encounter an issue of traveling,

Diagnosis: The paragraph ending is incomplete or does not return clearly to the mini-claim.

Student Action: Check the final sentence of each body paragraph: it must be complete and show how the result proves the topic sentence.

Detailed Paragraph Feedback

Introduction Paraphrase Precision

Moderate

Paragraph Locations: Introduction, Sentence 1

Exact Sentence Found

Some people may argue that towns and cities should be separated into zones, so all the same places are in the same area.

What This Sentence Is Trying To Do: This opening sentence is paraphrasing the proposition or context before the thesis states the response route.

Why This Limits the Band: The prompt frame uses vague nouns or imprecise relationships, so the thesis does not enter a fully controlled task route.

Kru Pom Diagnosis: Preserve the original proposition, but replace vague categories with the precise entities and relationship stated in the prompt.

Revision Type: Teacher-Guided Expansion

Targeted Revision

Some people argue that towns and cities should be divided into zones so that all the schools are in one area, all the shopping malls are located together and all the industrial sites are situated close to each other.

Why This Revision Is Stronger: The revision is anchored to the prompt and is labelled Teacher-Guided Expansion because it reconstructs the framing sentence.

Student Action: Underline the prompt entities and relationship, then paraphrase without changing the agent, policy or direction.

Thesis Route and Language Precision

Moderate

Paragraph Locations: Introduction, Sentence 2

Exact Sentence Found

However, I strongly disagree with the statement due to the lack of travel accessibility and traffic congestion.

What This Sentence Is Trying To Do: This thesis is stating the judgement and establishing the route for the body paragraphs.

Why This Limits the Band: The position may be visible, but the reasons or route wording are not expressed as precise consequences or functions of the proposition.

Kru Pom Diagnosis: Separate route clarity from language precision: preserve the judgement and state each body reason in a precise, parallel form.

Revision Type: Teacher-Guided Expansion

Targeted Revision

However, I strongly disagree because this arrangement could create travel difficulties and increase traffic congestion.

Why This Revision Is Stronger: The revision preserves the judgement and states the body routes explicitly in the thesis.

Student Action: Check that every thesis reason has a matching body paragraph and uses the same concept-level wording.

Body 1 Topic Sentence Precision

Moderate

Paragraph Locations: Body Paragraph 1, Sentence 1

Exact Sentence Found

First of all, the clusterization of a specific place could lead to the difficulty of traveling.

What This Sentence Is Trying To Do: This topic sentence is opening the paragraph's mini-claim and linking it to the thesis route.

Why This Limits the Band: The mini-claim uses vague wording or does not express its relationship to the thesis with enough precision.

Kru Pom Diagnosis: Keep the original reason, but make the paragraph subject, mechanism and intended result visible from the first sentence.

Revision Type: Route-Preserving Revision

Targeted Revision

First of all, concentrating the relevant facilities or services could lead to travel difficulties.

Why This Revision Is Stronger: The revision reduces vague wording while preserving the paragraph route.

Student Action: Compare the topic sentence with the thesis and circle the concept that must match.

Full-Response Grammatical and Sentence Control

Moderate

Paragraph Locations: Body Paragraph 1, Sentence 2

Exact Sentence Found

Every family is living in different places and distances, which could be very far away from their house, so it would be very difficult to travel through long distance.

What This Sentence Is Trying To Do: This sentence contributes to the paragraph's explanation or closure.

Why This Limits the Band: The progressive tense is not controlled for a general statement.

Kru Pom Diagnosis: tense control is a genuine language-control issue, not merely an optional high-band refinement.

Revision Type: Route-Preserving Revision

Targeted Revision

Families live in different parts of a city, so concentrating facilities of the same type in one designated zone could force some residents to travel long distances to reach them.

Why This Revision Is Stronger: The revision replaces the uncontrolled progressive tense, clarifies who lives where, repairs the noun and reference relationships, and uses a natural travel expression while preserving the accessibility route.

Student Action: Search the full response for the same tense control pattern and correct every recurrence before adding optional refinements.

Body 1 Example Development

Moderate

Paragraph Locations: Body Paragraph 1, Sentence 3

Exact Sentence Found

For instance, a student's house is very far away from his school, and it takes 3 hours to arrive there, so he needs to wake up at 5AM every morning, which lowers his energy and concentration in the class, resulting in bad grades.

What This Sentence Is Trying To Do: This example is trying to prove the paragraph's mini-claim through a situation, mechanism and result.

Why This Limits the Band: The example is relevant, but its mechanism or result is too narrow, vague or dependent on an unsupported causal chain.

Kru Pom Diagnosis: The example topic can remain; the repair is to make the affected group, mechanism and realistic result explicit.

Revision Type: Teacher-Guided Expansion

Targeted Revision

For example, students who live far from a centrally located school zone could face longer daily journeys, leaving them with less time and energy for study.

Why This Revision Is Stronger: The revision preserves the example route and adds an explicit mechanism as labelled teacher guidance.

Student Action: Rewrite the example as Situation -> Action/Mechanism -> Result and remove unsupported extreme outcomes.

Body 1 Paragraph Closure and Link-Back

Moderate

Paragraph Locations: Body Paragraph 1, Sentence 4

Exact Sentence Found

Therefore, when a certain place is clustered in one area, some people might encounter an issue of traveling,

What This Sentence Is Trying To Do: This sentence is closing the paragraph and returning the result to its topic sentence.

Why This Limits the Band: The paragraph ending is incomplete or does not return clearly to the mini-claim.

Kru Pom Diagnosis: Complete the sentence first, then use the same result to reconnect with the paragraph reason.

Revision Type: Route-Preserving Revision

Targeted Revision

Therefore, concentrating facilities or services of the same type in one designated area could cause some people to face travel difficulties.

Why This Revision Is Stronger: The revision completes the sentence and makes the link-back function explicit.

Student Action: Check the final sentence of each body paragraph: it must be complete and show how the result proves the topic sentence.

Body 2 Topic Sentence Precision

Moderate

Paragraph Locations: Body Paragraph 2, Sentence 1

Exact Sentence Found

Furthermore, there would be more traffic congestion when a specific place is divided into a zone.

What This Sentence Is Trying To Do: This topic sentence is opening the paragraph's mini-claim and linking it to the thesis route.

Why This Limits the Band: The mini-claim uses vague wording or does not express its relationship to the thesis with enough precision.

Kru Pom Diagnosis: Keep the original reason, but make the paragraph subject, mechanism and intended result visible from the first sentence.

Revision Type: Route-Preserving Revision

Targeted Revision

Furthermore, concentrating facilities or services of the same type in one designated area could increase traffic congestion.

Why This Revision Is Stronger: The revision reduces vague wording while preserving the paragraph route.

Student Action: Compare the topic sentence with the thesis and circle the concept that must match.

Body 2 Explanation and Mechanism

Moderate

Paragraph Locations: Body Paragraph 2, Sentence 2

Exact Sentence Found

Some places attract more people in some period of time, which could create a heavy traffic jam.

What This Sentence Is Trying To Do: This sentence is trying to explain the mechanism that connects the paragraph claim to its consequence.

Why This Limits the Band: The explanation relies on vague nouns or skips a causal step, so the reader cannot yet see precisely how the paragraph claim produces the stated result.

Kru Pom Diagnosis: The paragraph route is visible, but the explanation should identify the affected group, the change or mechanism, and the resulting consequence in a controlled sequence.

Revision Type: Teacher-Guided Expansion

Targeted Revision

During busy periods, concentrating destinations in one area could direct more travellers onto the same roads, increasing traffic congestion around that district.

Why This Revision Is Stronger: The revision makes the causal chain explicit and is labelled Teacher-Guided Expansion because it reorganises the mechanism for teaching clarity.

Student Action: Rewrite the explanation as affected group -> mechanism or change -> consequence linked to the topic sentence.

Body 2 Example Development

Moderate

Paragraph Locations: Body Paragraph 2, Sentence 3

Exact Sentence Found

For example, restaurants or shopping malls attract more people at breakfast, lunch, and dinner time; hence, people will be moving in the same direction at the same time, resulting in a large traffic congestion.

What This Sentence Is Trying To Do: This example is trying to prove the paragraph's mini-claim through a situation, mechanism and result.

Why This Limits the Band: The example is relevant, but its mechanism or result is too narrow, vague or dependent on an unsupported causal chain.

Kru Pom Diagnosis: The example topic can remain; the repair is to make the affected group, mechanism and realistic result explicit.

Revision Type: Teacher-Guided Expansion

Targeted Revision

For example, shoppers travelling to facilities concentrated in one district may use the same roads at similar times, increasing traffic congestion around that area.

Why This Revision Is Stronger: The revision preserves the example route and adds an explicit mechanism as labelled teacher guidance.

Student Action: Rewrite the example as Situation -> Action/Mechanism -> Result and remove unsupported extreme outcomes.

Conclusion Precision and Route Closure

Moderate

Paragraph Locations: Conclusion, Sentence 1

Exact Sentence Found

In conclusion, I firmly believe that specific places like towns and cities should not be divided into zones, thus all the same places are in one area, since this could contribute to the difficulty in traveling and the congestion of traffic.

What This Sentence Is Trying To Do: This conclusion is trying to restate the position or task route developed in the essay.

Why This Limits the Band: The conclusion does not close the route securely: multiple language-control issues in the conclusion.

Kru Pom Diagnosis: The conclusion must preserve the same position, use prompt-accurate reference, and close the established body routes in one controlled sentence without adding a new premise.

Revision Type: Route-Preserving Revision

Targeted Revision

In conclusion, I strongly disagree that urban areas should be divided into separate zones for different types of facilities, because this could create travel difficulties and increase traffic congestion.

Why This Revision Is Stronger: The revision uses the same position and body routes while repairing policy reference and clause control without introducing a different argument.

Student Action: Write one complete conclusion sentence that restates the same position and body routes using prompt-accurate terminology.

Personalized 7-Day Repair Plan

Day 1

Map the task route

Write the function of the introduction, each body paragraph and the conclusion in one line, then verify that every section serves the same task family.

Day 2

Repair causal mechanisms

Rewrite each body explanation as affected group -> mechanism or change -> consequence.

Day 3

Upgrade examples

Make every body example credible and explicit about situation, mechanism and result without unsupported extreme outcomes.

Day 4

Edit lexical precision

Replace vague nouns with topic-specific language and check word form, countability, noun reference and collocation.

Day 5

Control grammar and endings

Check tense, articles, prepositions, agreement, clause control, punctuation and incomplete sentence endings.

Day 6

Repair conclusion closure

Restate the same position or task route and the same body reasons without adding a new premise.

Day 7

Rewrite and proofread

Rewrite the full response, verify thesis-to-body matching, and complete a final development and language audit.

Task 2 Progress Summary

PREVIOUS SUBMISSIONS 1	PREVIOUS RANGE 6.0
LATEST RANGE 6.0	CURRENT MAIN REPAIR Keep the valid task route. Rebuild each weak explanation as affected group -> mechanism -> result, make examples credible, close the same route in the conclusion, and then complete a full language edit.
REPEATED ISSUE Body 1 Paragraph Closure and Link-Back	REPORT VERSIONS FOR LATEST ESSAY 2

Student-progress trends use distinct student submissions; report reruns do not create a new progress attempt.
